"So advanced it's simple"

Simplified operation.
Compose a better way to work.

Workflow Composer
for the imageRUNNER® ADVANCE Series

Create/Edit

Workflow Editor

MEAP Connector A
MEAP Connector B

Register MEAP Connector Definition File

Upload the created flow to the device

Workflow Composer Editor

Execute

Workflow Composer

MEAP Connector A
MEAP Connector B

Scan the document and enter index

Workflow Composer

Transmit scanned data and index to external system

External System

A solution that simplifies the Canon imageRUNNER ADVANCE system's operation by easily combining multiple user operations into a personalized, one-step button that accelerates workflows.

For example, a user can register a series of operations, such as scanning a letter-sized original, sending it by fax, and then storing a backup copy of a scanned PDF file in a network folder location.

Administrators can pre-define folders to make saving easier for users with a drop-down index, or leave it up to the users to designate a specific destination. The naming of files can be freeform or automated using either a scheme specified at the system-level, the user-level, or according to a designed pattern.

Seamless Connections

Workflow Composer automates the sophisticated input and output features of imageRUNNER ADVANCE systems through simple macros, as well as enhancing workflows through a number of standard and optional connectors and features.

It has a MEAP® application (installed on an imageRUNNER ADVANCE model) and a PC application (Workflow Composer Editor). It also includes Standard Connectors and offers Optional Connectors that can be purchased separately.

Workflow Composer Editor

Workflow Composer Editor is an application for creating flows on a Windows® based computer. To create a flow, first select an imageRUNNER ADVANCE model as the target. Once a model is selected, the Workflow Composer Editor connects to it, enabling you to create flows utilizing the available functions. When uploaded and registered in the selected target, the flow can be executed on the imageRUNNER ADVANCE system.

Flows stored in a target can also be retrieved, edited with the Workflow Composer Editor, and then uploaded to the target again or to other imageRUNNER ADVANCE systems.

Standard Connectors

MEAP Connector for SMB
Scan to send documents by SMB Protocol, with or without Index Data.

MEAP Connector for FTP
Scan to send documents by FTP Protocol, with or without Index Data.

MEAP Connector for WebDav
Scan to send documents by WebDav Protocol, with or without Index Data.

Index Lookup Option for MEAP Connector
Looks up the Index Data Table on an external server in conjunction with other MEAP Connectors.

Option: Other Server Connectors

MEAP Connector for Document Server
Scan to send the documents to imageWARE Document Server with Index Data.

MEAP Connector for SharePoint® Server
Scan to send the documents to SharePoint Server 2007/2010 with Index Data.

Advanced Productivity

Canon Workflow Composer easily transforms paper into business value by leveraging Canon imageRUNNER ADVANCE technology to bridge paper and digital workflows, seamlessly integrating paper documents and business applications.

- Multiple tasks combined into one operation with Workflow Connector buttons
- Scan documents with Index data
- Send to pre-defined or ad hoc destinations
- Eliminate or reduce processes
- Achieve goals in less time

Solution

A better way to work for everyone

Scanned Document

Send to a Shared Folder
Use Pre-determined
File Name
Add Indexes in XML file

Send E-Mail
Pre-determined Addresses
cc: to Self

Send to SharePoint Server
Select Library
Select Folder
Specify File Name
Add Indexes
